

Aster Robotics Field Manual

XR-7 inspection drone supports a maximum payload of 2.4 kilograms.

Standard battery endurance is 38 minutes in calm conditions.

Operators must complete the pre-flight checklist before every mission.

Aster Robotics Service Policy

Preventive maintenance is required every 120 flight hours.

Battery packs must be replaced after 500 charge cycles or if capacity falls below 80%.

Warranty claims require the device serial number and maintenance log.

Aster Robotics Safety and Support

XR-7 operation is prohibited in heavy rain and winds above 45 kilometers per hour.

Emergency support is available 24 hours a day for grounded fleet incidents.

Unsupported questions must not be answered from unrelated evidence.
